

Oh my goodness... oh my goodness... the calendars the calendars!!

Introduction:-

Over the past year or so, I have been urging many people to be ready for the coming of our Lord Jesus, who will shortly be fetching His “bride”.

I suspect there are many that have by now come to the conclusion that I have been barking up the wrong tree, and saying “Nobody will know the day and the hour”.

This is a brief summary of our journey and in particular our wrestle with the calendars.

This is the path we walked to finally get to the true understanding of which calendar is correct. I might just add that to date, I have not been able to find a single calendar that is correctly aligned with YHWH’s calendar – NOT ONE! Every single one has had some degree of inaccuracy. Enough to set us off in the wrong direction and create confusion and frustration. Never the less we persevered and we prevailed.

The purpose of this record is to demonstrate to you that we eventually came to understand ALL things correctly; however we were lead astray by the enemy who scrambled our calendars.

I’ve reconstructed the calendar for both 2BC and 2020AD based on our current understanding, and you will see for yourself that everything now lines up correctly. Jesus’ birthday **IS** on the day before the Feast of Weeks (New grain), and it **IS** on the 15th day of the 3rd month (4 July this year), and He **WILL** fetch His bride on the Feast of Weeks!

Our journey:-

It all started with the understanding that Jesus’ birth, based on the Bethlehem star, was on 17 June 2BC. This was determined using Stellarium to identify the exact day of the Jupiter/Venus conjunction. This once off conjunction event is a unique marker that nobody could move or change!

At about the same time we learned that the bride **IS** the First Fruits Tithe (new grain) and that the escape of the bride should occur **ON** the Feast of Weeks. We also learned that the correct count to the Feast of Weeks ends on the day after the 15th of the 3rd month. (At that time we were still of the understanding the Pentecost and Feast of Weeks (new grain), occurred on the same day. We later learned they are **NOT** the same Feast. Pentecost coincides with Feast of Weeks (new wine)

We then came to understand that 17 June 2BC (Jesus’ birthday) corresponded to the 15th of the 3rd month on the Hebrew calendar, which fell on the 7th of June this year. This understanding was reinforced by the fact that based on this date, and a perfect gestation of 280days, it could be shown that Jesus was conceived on the Feast of Trumpets. How perfect is this... **Conceived on Trumpets, Born on Feast of Weeks and Died on Passover!**

Knowing the bride is the First Fruits Tithe (new grain), and having found 2 modern day visions connecting Jesus' birthday to the escape of the bride, we expected the escape to occur on the 7th of June 2020, or the day thereafter.

7 June 2020 came and went....no escape!

We then concluded that God is probably using the Gregorian calendar, as He is fetching his Gentile bride, so 17 June being Jesus' birthday on the Gregorian calendar became our new focus. This was justified by the 10 day gap between 7 and 17 June this year, a unique gap as compared to other years, and supported by the known 10/40day ratio in the 50 day count between the 3 Feasts of Weeks. This ratio is also seen in both Jesus' resurrection and ascension account, and the Israelites arrival at Mount Sinai account, both which occurred around the time of Feast of Weeks (new grain).

Needless to say, 17th June came and went...no escape!

In came the "Creators Calendar" to the rescue.... as the 15th day of the 3rd month was still a future event at that point in time on this calendar. The Creators Calendar is based on the Sun Moon and stars which is perfectly scriptural, but advocates that the FULL MOON is the "true" NEW MOON and that the beginning of every month, unlike the Hebrew calendar which begins its month on the Crescent Moon, begins with a Full Moon.

The 15th day of the 3rd month on the Creators Calendar occurred on the 20th of June this year. This new target was underpinned by the Summer Solstice that occurred on the same day and the very unique "Ring of Fire" Solar Eclipse just 6 hours apart.

[It must be said at this point that there is a STRONG argument for both the Full Moon being the New Moon, and alternatively the Crescent Moon being the New Moon.]

Most frustratingly, the 20th of June came and went and STILL NO ESCAPE!

Now rather desperate, having had several forecast dates for the escape come and go, and many now frustrated and losing hope, we again latched on to the 10/40 day ratio, concluding that 30 June would be the day we sought. (10 days from 20 June)

However, before the new date arrived we realized that if 20 June was the true Feast of Weeks, according to our newly adopted Creators Calendar, we had a problem! We knew that Jesus was born on a Full Moon, but on the Creators Calendar the 15th of the 3rd month falls on a Dark Moon! So, Jesus could not have been born on the 15th of the 3rd month if the Creators Calendar is correct.

Consequently, we scrambled to adjust the known birthday of 17 June 2BC to align with the now fully adopted Creators Calendar, and soon determined that Jesus' birth occurred on 4 July 2020 (the 29th day of the 3rd month on the Creators Calendar). This new revelation became our new focus before the arrival of the previous target, i.e. 30 June. So we saved ourselves the embracement of again having a date come and go.

However, a new problem arose. If Jesus' birthday was no longer on the 15th of the 3rd month, then his conception could not have been on the Feast of Trumpets (1st day of the 7th month). The new conception date, determined to be 17th day of the 6th month could meet the scriptural requirements but seems unlikely.

There was another problem. A recent study of the apocrypha scriptures "The First Book of Adam & Eve", which clearly confirmed all our understanding of the correct counts to the Feast of Weeks and a number of other unique understandings gleaned from our 66 book cannon, highlighted the importance of the First Day of the Week in YHWH's reckoning. Knowing how this is all connected the Feast of Weeks but which was now no longer in play if Jesus' birthday was in fact on the 29th day of the 3rd month. The day after the 29th day of the 3rd month is never a "First day of the week", it is either a New Moon day or a Transition day.

These apparent anomalies, together with the knowledge that the bride **IS** the **FIRST FRUITS TITHE (NEW GRAIN)**, and that the Feast of weeks according to all known calendars was a thing of the past, questions as to how this was possible, and the bride still being here, began to plague our brother and ministry leader, Alain.

Alain soon realized that there is exactly a month between our original forecast escape date - 7th of June, and our now determined escape date - 5 July, and that the Feast of Weeks (New Grain) had in fact not come and gone as supposed, but was still coming up on the next FULL MOON (4/5 July), and that the Hebrew calendar had begun their Year one month too early, having added a 13th month to last year's calendar instead of this year's calendar.

This understanding is supported by historical fact that Israelite farmers last year started the harvest a month too late and suffered damage as a result. Because the Hebrew calendar is set out far into the future, an adjustment was not made to this year's calendar to rectify the problem, knowing that next year; the seasons will again come into sync. So this year all the Feasts are being celebrated on the **WRONG** days!

Further, a recently discovered study done by the team at "Worlds Last Chance" (WLC), highlights the importance levied by our church fathers on ensuring that the Feast days that fell on the 15th of their respective months were observed **ON** the FULL MOON, in the **MIDDLE OF THE MONTH**. This study is available at: <https://www.worldslastchance.com/yahuwahs-calendar/new-moon-day-the-dawn-after-conjunction.html>

The WLC site also presents an easy to understand arguments in support of starting the Month on the Crescent Moon... well worth the time.

Although the team at WLC have developed a Lunar Solar Calendar that aims to meeting all the scriptural requirements, as does the Creators Calendar team, they seem to number their days correctly, but have missed the mark when determining the true beginning of the year, as they too are one month too early

on their calendar this year. The Creators Calendar team, who claim to have the ONLY calendar that meets ALL the scriptural requirements, is out both in terms of numbering their days and determining the correct starting point for the year,. Go figure...

Al though the Hebrew Calendar numbers their days correctly, and has for the most part been correctly aligned to YHWH's calendar, they have been careless of late in determining when the 13th month is to be added to ensure that the seasons remain in sync, and have aggravated this error by not correcting their calendar when evidence on the ground brought it to their attention.

Faced with the dilemma of not finding a single calendar that is correctly numbered and aligned, I have constructed a revised 2020/2021 calendar so that we can clearly see and confirm that we are now correctly aligned. (Attached below)

I have also reconstructed the 3/2BC calendar so that we can again confirm Jesus birth, on the 15th day of the 3rd month, the day before the Feast of Weeks, and His conception date on the Feast of Trumpets 280 days prior in the year 3BC. (Attached below)

It is interesting to note that prior to Jesus' birth, His conception year, was a 13 month year, just as the year prior to this year should have been a 13 month year!

Conclusion:-

1. The confirmations we received for "17 June" and the "50day" count (to Feast of Weeks and the second count to the red horse rider Rev 6:3&4...) being **RIGHT ON TARGET!** - is 100% correct.
2. Our understanding that the Feast of Weeks (New Grain) that falls on the 16th day of the 3rd month, and always on the first day of the week , and will be on 5 July this year - is 100% correct.
3. Our conclusion that Jesus was born on the 15th day of the 3rd month, the day before the Feast of Weeks (New Grain), and will be on the 4th of July this year -is 100% correct.
4. Our understanding that the bride **IS** the First Fruits Tithe (New Grain) - is 100 % correct.
5. Our understanding that the true Feast of Weeks that is to be observed on the 16th day of the 3rd month, and falls on 5 July this year-is 100% correct.
6. Our understating that the bride of Christ will escape all these things that are about to come on the earth (Luke21:34 to 36), will occur on 5 July this year ...

SHALL BE PROVEN TO BE 100% CORRECT!
